github.com/piyush200426

Full Stack Developer experienced in building web applications with Laravel/PHP, React.js, JavaScript, MySQL and REST APIs. Hands-on with ERP, SaaS, eCommerce, inventory, payments, wallet/commission and referral systems, with experience across frontend development, backend business logic, API integration, database relationships, validation, debugging and performance-conscious implementation.

PROFESSIONAL EXPERIENCE

Backend Developer

Global Garner Sales Services · Ahmedabad

Aug 2025 – Present

- Develop and maintain Laravel/PHP backend modules, database workflows and admin functionality for business applications.
- Build responsive frontend interfaces and application features using React.js, JavaScript, HTML5 and CSS3, integrating them with backend APIs.
- Build CRUD operations, validation, authentication/authorization flows, database relationships and reusable application components.
- Work with REST APIs and third-party integrations, including payment workflows and Razorpay integration for eCommerce use cases.
- Implement business logic for inventory, orders, referrals, wallets and commission-based workflows.
- Use JavaScript libraries and reusable frontend components where required, while debugging and improving application performance.
- Use AI-assisted development workflows where useful for faster implementation, debugging and development productivity.

TECHNICAL SKILLS

Languages

PHP, JavaScript, React.js, HTML5, CSS3

Frameworks

Laravel, React.js, MVC Architecture

Databases

MySQL, MongoDB

Backend

REST APIs, CRUD, Authentication, Authorization, Validation, API Integration

Systems

ERP, SaaS, eCommerce, Inventory, Orders, Wallet & Commission

Payments

Razorpay, Payment API Integration

Tools / Cloud

Git, GitHub, AWS, JavaScript Libraries, AI-assisted Development

SELECTED PROJECTS

Tracklio

Laravel · PHP · MySQL · React.js · JavaScript · APIs

Worked across backend modules and frontend integration, including business logic, database operations, React.js interfaces, API integration, admin workflows, debugging and performance improvements.

Pharma ERP

Laravel · PHP · MySQL

Built ERP backend workflows including batch-wise inventory management, FIFO stock logic, CRUD modules, validation, database relationships and admin operations.

SaaS Application

Laravel · PHP · MySQL · React.js · REST APIs · MVC

Developed reusable backend and frontend modules, CRUD operations, business workflows, REST APIs, validation and administrative functionality for a SaaS application.

eCommerce Platform

Laravel · PHP · MySQL · Razorpay

Implemented product and order workflows, admin functionality and Razorpay payment integration with transaction-oriented backend handling.

MLM / Referral & Wallet System

Laravel · PHP · MySQL · REST APIs

Implemented multi-level referral relationships, wallet transactions and commission calculation/distribution with validation and backend administration.

CORE STRENGTHS

- Full stack application development
- React.js frontend development
- Laravel/PHP backend development
- REST API & third-party integration
- Database design & relationships
- Debugging & performance optimization

EDUCATION

Bachelor of Computer Applications (BCA)

President Institute of Computer Application, Ahmedabad

May 2025
